Onboarding with Bitlog

For us, ensuring client success is a top priority. We have developed a reliable onboarding process for a seamless experience including the following four steps.

STEP 1

Preboarding

We visit your warehouse(s) to ensure operational processes align with management's goals and expectations.

STEP 2

Onboarding

Kick off meeting to discuss metrics, form a steering group, address emotional changes from the transition, discuss solution design, and map out the implementation timeline.

STEP 3

Go Live

Bitlog staff will be onsite at the warehouse to support you, answer questions, and provide assistance if/when needed.

STEP 4

Scaling

Besides scaling the product, new customers join the Bitlog community after go-live. Attend Bitlog summit, contribute to the product roadmap, and network with likeminded.
